

CORNELL'S ROBOTICS PROGRAM 'BOOM'ING

MATTHEW HINTON / Journal Staff

Project Fe students demonstrate one of their walking robots at Cornell University's BOOM (Bits On Our Minds) 2006 at Duffield Hall Wednesday afternoon. Fe is an undergraduate research project team made up of science and engineering students at Cornell with a focus on walking robots. The students are: Mechanical engineering senior Ellie Weyer, top left; operations research and industrial engi-

neering junior Jeff Schvey; and mechanical engineering sophomore Chris Chang. Other students watching the demonstration are freshman physics major Angie Wolfgang, center; freshman mechanical engineering major Erik Hugel, and applied economics and management freshman Rebecca Costello. The Project Fe team began this particular project in January 2005.
